Computer Scientist at Tinker AFB supporting mission-critical software within the 76th Software Engineering Group, with experience building production web, mobile, and cloud applications using React, Next.js, React Native, TypeScript, Python, AWS, Google Cloud, and Firebase.

EDUCATION

- The University of Oklahoma**
B.S. in Computer Science; GPA: 3.70/4.0

Norman, OK
Aug. 2022 – Dec. 2025

EXPERIENCE

- United States Air Force**
Computer Scientist
Oklahoma City, OK
May 2026 – Present
 - Computer Scientist at Tinker AFB supporting mission-critical software efforts within the 76th Software Engineering Group, contributing to JSE development workflows using Jira, Crucible, and Confluence for task tracking, code review, documentation, and engineering coordination across Agile, Scrum, and Waterfall environments.
- Freelance**
Full-Stack Developer
Remote
Dec. 2024 – Apr. 2026
 - Built and shipped production web, mobile, and e-commerce products for Earthly Cannabis L'Atelier, Usera.Space, DRX Genius LLC, and Gametime Rehab using React, Next.js, React Native, Expo, TypeScript, Firebase, AWS, and Google Cloud.
 - Developed Earthly's company website (earthly.us) with Next.js and AWS Amplify for CI/CD and hosting; led migration of its e-commerce storefront to Shopify by translating Figma designs into Liquid themes and storefront functionality.
 - Developed Usera.Space's Wird habit-tracking iOS app with Expo and Firebase, implementing push notifications, RevenueCat subscriptions, and interactive 3D features with React Three Fiber; also built web properties with Squarespace, Next.js, Payload CMS, SSR, and AWS SST.
 - Led DrX Telehealth app modernization from concept to iOS and Google Play launch with React Native, Expo, TypeScript, Google Cloud, and Firebase; redesigned UI/UX in Figma and implemented WebRTC video conferencing, real-time chat, and Stripe payments.
 - Delivered Gametime Rehab MVP with a library of 3,000+ rehab exercises using React Native, Expo, and Firebase, plus Python Playwright scrapers for automated data collection and processing.
- UFLIP**
Software Engineer Intern
Oklahoma City, OK
Feb. 2023 – Sep. 2024
 - Designed production-ready interfaces in Figma and developed inventory, admin, and staff management apps with JavaScript and Next.js, streamlining workflows and supporting company growth.
 - Integrated frontend with backend via Apollo (GraphQL) and Nhost (Hasura), enabling seamless real-time data fetching and reducing API response latency by ~20%.
 - Led SCRUM meetings and coordinated cross-team efforts to ensure timely project delivery.

PROJECTS

- Roblox Game Automation:** Developed a Python-based computer vision system to automate in-game actions by collecting and labeling images with CVAT and training a YOLOv8 model to detect UI elements.
- Game Modding:** Developed a mod for the game *Ravenfield* with C# and Lua, implementing pathfinding and custom weapon, vehicle, and AI behaviors, converted assets via Blender and Python batch scripts for Unity integration. The mod earned 460+ ratings, 32,430+ subscribers, and 1,280+ favorites in the Steam Workshop, making it a one of the more popular mods for the game.
- MyJournal & CalPal:** Developed full-stack productivity apps for school including *MyJournal* (TypeScript/React Native/Expo, Firebase) with authentication, streaks, and gamification, and *CalPal* (React, Next.js, Express/Node.js) with calendar, friends list, and API integrations for group coordination.

LEADERSHIP

- OU UX Design Club**
Club Executive; Workshop Coordinator & Web Developer
Norman, OK
May 2024 – Present
 - Led design workshops on strategy, fundamentals, and Figma; designed club website and collaborated with club members to build and deploy a responsive UX.

SKILLS AND AWARDS

- Languages:** Java, C#, C++, JavaScript (ES6+), TypeScript, Python, HTML/CSS, SQL, PostgreSQL, GraphQL, Kotlin, Liquid, Lua
- Tools & Platforms:** Git, Docker, Firebase, Amazon AWS, AWS Amplify, Google Cloud, Cloudflare, Shopify, Stripe, RevenueCat, Jira, Crucible, Confluence, Playwright, Figma, Blender, Unity
- Frameworks:** Next.js, React, React Native, Expo, Express, Redux, Zustand, Apollo, Payload CMS, React Three Fiber, WebRTC
- Methodologies:** Agile, Scrum, Waterfall, CI/CD, code review, technical documentation
- Awards:** Award of Excel RTW (High GPA), granted to students scoring 32+ on the ACT.
